Rip, convert, copy and protect your videos to a wide range of devices, all in one tool! DVDFab Ripper Suite Pro is a bundle of tools that allow you to copy, rip and convert files found on a DVD or Blu-ray disc. The application displays an intuitive interface design which makes it very easy to use. DVDFab Ripper Suite Pro is separated into tabs which offer you quick access to where you need to be when you want to copy a disc to your computer for backup purposes or rip it so it can be watched on a certain type of player. Moreover, the application allows you to load files from your hard drive and convert them to other formats so they can be played on various mobile devices. When it comes to this, you are able to apply changes to both video and audio characteristics of the source files. You can choose the codec, resolution, encoding method, video quality, frame rate and others. Equivalent parameters can be changed for the audio files as well. Whether you're copying a DVD or ripping it, the process is basically the same. Without any sort of complications, the application automatically recognizes the content of a disc that is inserted into your drive and displays it the main window. From there you can select the chapters you want to transfer and with a simple click DVDFab Ripper Suite Pro begins the process. Before you get to copying or converting, you can preview the video files using the built-in player that the application is fitted with. DVDFab Ripper Suite Pro also comes with a tool that allows you to create your own discs. You are free to choose from a wide variety of templates that the application puts at your disposal but at the same time can customize them to fit your taste. To sum things up, DVDFab Ripper Suite Pro is by all means a video disc utility that can pretty much do it all and do it well.

Q: List.IndexOf doesn't seem to be working I'm trying to delete a record from a list. I remove the record from the DB, add it to the DB, remove it from the DB again, add it to the list... and then try to remove the record using List.Remove(record) and it's not working. It is not throwing any errors either (and the IDE is telling me that the list is currently read only).

DVDFab Ripper Suite Pro Crack+

DVDFab Ultimate is a collection of tools that let you rip your favorite DVD and Blu-ray to video and audio files for use on a variety of portable devices. The application is designed in a Windows style that makes it very easy to work with. All the tools are divided into tabs and you can apply settings directly by using DVDFab Ultimate. You are able to view your material on a big screen using the built-in player and select the disc sections you want to copy. The key feature is that the application can rip any DVD or Blu-ray disc to a variety of video and audio formats. To do that, you can choose between the three most popular types of ripping. The first option, MPEG-4 AVC, lets you convert video files to this format. The second option is MPEG-2 TS, which allows you to copy video files to video format that is used by portable devices and by recorders. The last option, DVD/BR Video MPEG-2 TS, allows you to convert video files to the format required by Blu-ray players. After you have chosen your format, you can set the encoding parameters to specify video quality, video size, audio quality, language, codec, frame rate, audio channel, subtitles and other options for audio. The same options are also provided for video files. With DVDFab Ultimate you can also extract audio files, including the main menu, chapters, and other parts of a disc. Along with ripping, you can also manage files and create custom disc projects. To make this happen, you can choose to create a disc with just video files or just audio files or audio and video files. Also, you can select sections to create a single disc or split it into separate disc projects. Moreover, DVDFab Ultimate can combine multiple disc sources into one disc project. The application does come with a guide that will show you how to work with it and if you want to go step by step you will find yourself a very clear and user-friendly interface. Features: - Quickly convert your DVD/Blu-ray to any format for use on a variety of devices - Convert Blu-ray or DVD discs to various video formats including MPEG-4 AVC, MPEG-2 TS, DVD/BR Video MPEG-2 TS - Convert the main menu, chapters, and bonus features of a DVD disc - Capture audio from a DVD/Blu-ray disc with various quality settings - Extract individual audio
